

ALEX

PROFESSIONAL AUTOGAS INSTALLATIONS

OPTIMA nano OBD

Controller for engines with multipoint injection systems.

ALEX OPTIMA NANO OBD is the most advanced sequential gas injection controller in the class of 24-pin controllers, featuring a built-in OBD support module. The innovative algorithm precisely adjusts the gas dosage according to engine load and operating conditions across the full RPM range, reducing gas consumption.

The compact housing of the OPTIMA NANO controller with integrated OBD module makes it an ideal solution even for very limited spaces under the hood. At the same time, the device offers a full range of advanced features such as OBD-based calibration, error clearing, and self-adaptation.

Main advantages:

- Supports 3/4-cylinder engines
- Compact housing
- Quick installation - 24-pin connector
- OBD Module

Homologations:

- E8 10R-0617490
- E8 67R-016560
- E8 110R-006561
